Benchmark

S&P BSE 500 TRI

PMS Strategy Inception Date

20<sup>th</sup> January 2023

Portfolio Manager

Valtrust Partners LLP

SEBI PMS Registration No.: INP100007578

Strategy type

Open Ended

### Investment Objective

This is a long-term strategy that will primarily invest in Indian public equities with an aim to generate capital appreciation by capitalizing on the continuance of an existing market trend. The strategy will apply technical indicators to the analysis of a security in order to identify trends and gauge the strength of the trend. The strategy aims to capture significant investor biases like initial underreaction, delayed overreaction, herd mentality, and confirmation bias.

### Performance

	1M	3M	1Y	3Y	5Y	Since PMS Launch	Since Inception (strategy launch)
Valtrust Momentum	-0.5%	-5.3%	15.6%	23.7%	25.4%	21.7%	27.9%
S&P BSE 500 TRI	0.5%	-3.1%	17.3%	17.7%	14.2%	14.8%	15.3%

## Key Characteristics

Particulars	Description
<b>Investment objective</b>	To generate capital appreciation over medium to long term by systematically identifying and allocating capital to equities exhibiting high-conviction price momentum. Utilizing a data-driven, algorithmic framework, the portfolio ranks and selects stocks by emphasizing smooth, sustained performance relative to their risk (volatility-adjusted returns). The portfolio's goal is to capture trend continuation.
<b>Description of securities</b>	Clients' funds under the Valtrust Momentum portfolio would mainly be invested in the equity shares and instruments of companies listed in India. Some part of these funds might be placed in equity ETFs, liquid or ultrashort short funds/ETFs, units of money market instruments, units of mutual funds or might be retained as bank balance in bank account.
<b>Basis of selection of securities</b>	Stocks selection takes place based on momentum. Up to 32 stocks with strong technical trends are selected by taking positions in stocks going up and selling them when the trend reverses.
<b>Allocation of portfolio across type of securities</b>	The Portfolio is designed with a core mandate to invest majorly in equity securities seeking diversification across various sectors and market capitalizations. While maintaining a major focus on equity, the Portfolio Manager may, at times, tactically allocate a portion of the funds to equity ETFs, liquid or ultrashort short funds/ETFs, units of money market instruments, units of mutual fund or might be retained as bank balance in bank account.
<b>Appropriate Benchmark</b>	S&P BSE 500 Total Return Index (TRI)
<b>Basis for choice of benchmark</b>	The investment strategy will employ a multicap approach, incorporating holdings from large-cap, mid-cap, and small-cap companies. Following the SEBI directive of April 1, 2023, which requires the selection of a benchmark from Nifty 50 TRI, S&P BSE 500 TRI, and MSEI SX 40 TRI, the S&P BSE 500 TRI has been selected as the most suitable benchmark for this Portfolio.
<b>Minimum investment</b>	INR 50 lakh per PAN, as stipulated by SEBI (PMS) Regulations, 2020 (or any subsequent SEBI-stipulated amount).
<b>Indicative tenor or investment horizon</b>	Medium to long term horizon of 3-20 years.
<b>Lock-in period</b>	This investment approach shall not be subject to any lock-in period.
<b>Exit load</b>	Nil

### Disclaimer:

Prospective investors are advised to carefully review the Disclosure Document, Client Agreement, and other related documents carefully and in its entirety and consult their legal, tax and financial advisors to determine possible legal, tax and financial or any other consequences of investing under this Portfolio, before making an investment decision. Further, the information contained herein should not be construed as forecast or promise.

Performance related information provided in this document is not verified by SEBI.

Performance of your portfolio may vary from that of other investors and that generated by the investment strategy because of the timing of inflows and outflows of funds.
